

# THE CHAMPION CHRONICLE

VOLUME 7

CHAMPION, (Alberta) THURSDAY, APR. 15, 1926

## SAVOY CAFE

Our patrons say we are giving the best meals and service that has ever been available in Champion. Our prices, too, are recognized as very reasonable. We feel sure we can convince you this estimate is correct, and suggest a trial at least.

Leo. M. Roberts.

## Dr. R. R. McIntyre

DENTIST

714 Herald Block, - Calgary.  
Will be in Champion every Thursday each week.  
Appointments may be arranged at Moffatt's Hardware.

## J. FRED SCOTT LL.B.

Barrister, Solicitor, Notary Public, of 213 Lancaster Hotel, Calgary, will be in Champion every Thursday afternoon and evening, in old Municipal office.

Champoin Lodge  
No. 84.  
A. F. & A. M.  
G. R. A.

Meets each Thursday in each month. Visiting brethren welcome.  
CHAS. McLEAN, E. F. CRAWFORD  
W. M. R. S.

## Tennis Club Organized

The annual meeting of the Champion Tennis club was held in the Canadian Bank of Commerce rooms on Tuesday, April 13th, to elect officers for the ensuing year. The following officers were elected: President, J. D. Henderson; vice-president, B. M. Roberts; Secretary, Mrs. W. A. McIntyre; Grounds committee—Chester Hyndman, C. Thornton, G. A. Orr, H. Hammel and Joe Mark. For adults and those who do not wish to be under restrictions, \$3.00; school children under restrictions, \$1.00. Those intending to play should have the fee in the hands of the secretary by May 1st. No Pay—No Play.

## Alston Baseball Dance Was Success

The members of the Alston baseball dance committee are to be congratulated on the success of the dance held on Friday evening, April 9th, arrangements being complete in every particular. The Drummond orchestra provided excellent music, the attendance was large and everyone enjoyed themselves. The result to the baseball club was swelled by donations from the orchestra, Miss Sarah Biengsman, L. B. Oshelner, E. Lawrence and G. E. Volney.

Mr. and Mrs. Frank Anderson, of Calgary, were visitors in town on Tuesday, having driven from Calgary to the farm on Monday. They were greeted by many old friends while here. Mr. Anderson looks for an official in oil stocks at any time, but is strongly of the opinion that hogs provide a better investment for the farmer.

W. A. Jones, of Los Angeles, son-in-law of G. E. Smith, met with a painful accident a few weeks ago, falling from an engine on the electric railroad, breaking the shoulder blade and two ribs and other bruises which kept him in the hospital for some weeks.

The unusually warm weather this spring has promoted a rapid and early germination of weed seeds and cultivating operations in progress should be more than usually effective in leaving a clean seed bed. It is anticipated the average this year will be larger than ever.

Messrs. Bert Gill, G. M. Campbell, J. D. Henderson and O. Running drove to Calgary on Saturday to look over the oil situation. The party intended to return via Turner Valley but bad roads prevented this feature of the trip.

A. W. Jopling moved during the week to G. F. Smith's town residence, the latter moving to the farm for the summer. P. O. Saunders, who recently purchased the Jopling property, moved in from the farm this week.

Painting operations are proceeding on the Beaver Lumber Co's premises and already a big change has been effected. When the job is completed Manager McLean will have one of the nicest yards in the country.

It is part of our service to get repairs for you promptly. This is essential if you are to keep your equipment in good shape—W. C. Hoskins.

## High School Girls Entertained

Lavishly garlanded with realistic chickens and plants Campbell's hall was converted into a bower of springtime loveliness Tuesday evening, April 6th, when the long looked for party for the high school girls and boys took place. Madams Leo, Stoddart, Galloway, Johnson, Crawford and Campbell received the guests of whom about 50 were in attendance. Games of all kinds were in order for the first part of the evening, followed by a bright dance program provided by Miss L. Watkins and B. Hummel. Dainty refreshments served at midnight brought a thoroughly enjoyed evening to a close.

## Will Hold Flower Show

The W. I. are holding a flower show the first week in September in Campbell's hall. Prizes will be given to school children in town and country for plants and flowers grown by themselves. Further particulars will be given later in The Chronicle. Teachers are requested to take notice of this item.

Spooner Oils Limited is another company recently organized, in which Vulcan manifests much interests. Mr. Spooner, who was a resident many years in Vulcan, has associated with him in the new company, two other Vulcan business men, Messrs. A. J. Flood and L. H. Stack, respectively secretary-treasurer and solicitor. There is an exceedingly great demand locally for stock in the new oil enterprise.—Vulcan Advocate.

There does not appear to be any disposition to promote a baseball team in Champion this summer, a fact that will be regretted by many enthusiasts. The general opinion would appear to be that too strenuous efforts are required to keep a winning team in the field.

Mrs. D. Pierson and family left for Calgary on Tuesday, where they will reside in future. The family has resided here for some years and many friends will wish them success in their new home.

The play "And Home Came Ted", being prepared under the supervision of Mrs. Ryan will be put on shortly. The cast is working hard and the production should be the big event of the season.

Last week provided several practically perfect spring days, any possible fault found being that they were too warm. With this possible exception nothing more pleasant could possibly be imagined.

Mrs. Pierson's sale on Saturday was well attended and the results were fairly satisfactory although everything was not sold. A. Hopkins was the auctioneer.

A number of O. E. S. members attended the Chapter at Carmangay on Wednesday, some assisting in the work owing to the illness of Carmangay members.

Geo. Mark was one of the early ones out with a paint brush, decorating his implement warehouse very successfully.

## Housewives! Read These Prices!

They are much lower than you are paying. Give us a trial order.

Fels Naptha Soap, per carton.....	.95
Swift's White Laundry Soap, 17 bars.....	1.00

Commercial rates on application.

THURSDAY, APR. 13, 1926

## NOTES AND COMMENT.

Redistribution, as interpreted by the Brownlee government, is not an exciting affair by any means. That there is and has been a feeling throughout the province that there is an unnecessary number of ridings in the province, resulting in an unwieldy legislature, will scarcely be denied. The failure to recognize this feeling by the government, would seem to indicate that the members of the legislature were more interested in preserving their own ridings than in giving expression to the wishes of their constituents. The trifling changes made in the vicinity of Medicine Hat would certainly please no one if extended on the same basis to other parts of the province, as it requires a wonderful stretch of imagination to consider these changes in any other guise than a distinct effort towards political advantage.

An effort was made during the present session of the provincial legislature to extend the municipal franchise to tenants. While such legislation is in force in almost every province in the Dominion the proposal was rejected by the government majority. In this respect and in school legislation Alberta is willing to stay years behind.

## NEWS NOTES

Improved prices were noted at the annual bull sale at Calgary recently. A total of 455 bulls were sold for \$72, 850 or an average of \$160 a head, an increase of \$20 over the previous year.

Six carloads of beet seed for the sugar beet fields of Southern Alberta have arrived at Raymond and will be distributed to the beet growers at once in preparation for the coming season.

Two thousand head of buffalo from the Weinwright National Park in Alberta will be shipped to the north country to be turned loose on the range between the Slave and the Peace Rivers.

The surplus of \$112,000 transferred to Alberta from the former wheat board, has been placed in a trust fund and will be devoted to furtherance of co-operative marketing and the betterment of Agriculture in the province. The Legislature decided to place the fund in charge of a trustee board of from three to seven members.

The sale of the Alberta Pacific Grain Company assets to the Royal Securities Corporation of Montreal, is announced. The sale it is stated, involves more than \$6,000,000.

The Alberta Legislature adjourned Thursday evening after a session of nearly eight weeks, to meet again May 5, to complete the legislation in connection with the return of the Natural Resources to the Province. The provincial bill regarding this transfer has been passed to the third reading, and now awaits the dominion bill to be ratified by the federal house.

In the budget speech of the Provincial Treasurer, Hon. B. G. Reid, delivered to the Legislature, it is estimated that 150,000 people visited the National Parks of Alberta last year. Assuming that only half of these were from outside the province

and that each spent only \$200 during his stay, the money brought into the province by such traffic would be \$15,000,000.

From March 1925 to March 1926, at the Dominion Land Office at Edmonton, over 1000 homesteads were filed on and 60 soldier grants taken up which was a very large increase over the previous year.

Mr. George Gooding, who resides not far from Kirkcaldy, suffered an accident on Tuesday evening. While working about the place he was kicked by a horse and the result was a broken arm. Mr. Gooding is sixty-eight years of age, and an injury of the kind at this time of life is serious as well as painful. However, he has the goodness of a much younger man and will no doubt over-

come this temporary injury—Vulcan Advocate.

The municipal ball insurance calendars were distributed this week, with an announcement of changes in policy, the most important of which is the division of the province into zones with proportionate rates. The calendar itself is a handsome one, the reproduction of a photo of Lake Louise being exceptionally attractive.

Work on the land has been in progress for some time, particularly the cultivation of fields in preparation for the sowing of wheat. Many were prepared to commence actual seeding on Monday.

## All-Canada Supplement

An All Canada Supplement is being prepared by The Christian Science Monitor. This will be issued on April 16 next. At the present time, when much thought is being devoted by

Canadians to the fostering of a true national and international spirit, this issue of The Monitor will do much to aid in this direction, besides telling to the world the story of Canada's progress and possibilities. The progress of the Province of Alberta in its relation to the Dominion as a whole will receive due attention in this supplement. Alberta's contribution to the cultural life of Canada, as well as its achievements in relation to agriculture and other industrial lines, being duly set forth.

The Christian Science Monitor was established in 1908, its first issue appearing on Thanksgiving Day, November 23 of that year. This unique international daily newspaper was established by Mary Baker Eddy, the Discoverer and Founder of Christian Science, and author of its textbook, "Science and Health with Key to the Scriptures." In telling of her purpose in establishing this newspaper, Mrs. Eddy wrote: "The object of The Monitor is to injure no man, but to bless all mankind."

The progress of Canada is being substantially aided by this unique newspaper, the policy of which has been appropriately expressed by its present editor, Willis J. Abbott, as "headlining happiness."

# Ford Introduces National Payment Plan

For twenty-one years the Ford Motor Company of Canada, Limited, has pioneered in the field of motor transportation, doing everything possible to make high quality cars easy to buy and economical to own, in order that the greatest number of people may enjoy the benefits and advantages of owning a car.

In line with this policy, a new and unique time payment plan has been inaugurated which makes it possible for more people to own Ford cars.

This is called the National Time

Payment Plan because the payments are the same anywhere from Halifax to Vancouver.

Through this plan you know definitely in advance, the amount of the down payment and the installments required to buy the car you want.

You pay only the advertised amount—no more. All Ford models are now obtainable on this plan from your local authorized Ford dealer in conjunction with Traders Finance Corporation, Limited.

## NATIONAL TIME PLAN PAYMENTS

Payments throughout Canada are standard. Down payments do not vary regardless of tax, license, insurance, freight and delivery charges

# Canada Now Occupies A Prominent World Position As Regards The Poultry Industry

With rather startling suddenness Canada has sprung to a prominent position with regard to her poultry and its industry. Prior to a couple of years ago Canadian birds had never been exhibited abroad. After showings at the International Poultry Congress in Spain and the British Empire Exhibition in England, this year was experienced in bringing about a unanimous decision to hold the International Poultry show in the Dominion in 1927, for which preparations are now being made. At the same time, Canadian birds came into demand for the improvement of stock, and they are now going abroad to the value of, at times, \$50,000 a year.

Within the past couple of months a consignment of ten cockerels, valued at \$400, left British Columbia for Denmark, and a shipment of fifty Wyandottes went from Ontario to Holland, being consigned to the Dutch Government there. Progress has been rapid and is still continuing. A great number of poultry is being kept on farms throughout the Dominion every year and the production of eggs is steadily rising. Poultry in Canada totalled 43,122,340 head in 1925 as against 47,528,130 in the previous year, and the production of farm eggs was 224,778,000 as against 217,950,340 in 1924, and 212,648,685 during 1923.

The greatest progress has been evidenced in the poultry industry where one of the tendencies in the movement towards diversification in agriculture has been a steadily increasing interest in egg and poultry production, and where a dependence upon imports in this regard has been changed to the exportation of considerable quantities of eggs and poultry. Whereas there were but about thirteen million head of poultry in the western provinces in 1915, there were more than 20,000,000 head in 1925.

Western Canada, in particular, has been most progressive and energetic in meeting the problem of marketing with regard to poultry and eggs through co-operative organizations. All the provinces now have their own co-operative societies of collection and disposal. In Manitoba, through this cooperation, the province, which was importing these products a few years ago, is now exporting voluntarily to Eastern Canada and the United States. Poultry exports from that province are also effected on the co-operative system, double between 1922 and 1924, and showed further increase in 1925. In Alberta, which has left its dependence behind it and now exports upwards of 80,000 cases of eggs annually to Canada, Scotland and other countries, a poultry and egg co-operative commenced operations in November last. Government marketing stations have been opened at Edmonton, Edmonton, Calgary and Lethbridge, where eggs and poultry are sent, graded, the shippers receiving 30 per cent of the value of the shipment.

## Canada and Japan

### New Record For Foreign Trade Set Last Year

The annual report of the Japanese consul at Vancouver shows that the trade between Canada and Japan increased more than \$2,000,000 during 1925, setting a new record for foreign trade between the Orient and Canada. The total volume of trade was \$32,125,000, of which \$22,162,278 was in exports, and \$9,962,722 in imports from Japan. The Japanese exports alone was nearly \$2,000,000 more in imports the increase was more than \$1,000,000. Recent trade volumes have been—1924, \$30,274,100; 1923, \$27,735,524.

### Annuity Awaits Missing Son

Thomas Bernard Pilon, a son of the late Sir Thomas Pilon, who was living in Canada when he was killed, is believed to have had relatives in the Canadian forces and served in France. In 1914, it is living, is entitled to an annuity of \$750 from the Government. Thomas Bernard Pilon, coroner, resided with members of the family, and since the war no trace of him has been found, although his father made extensive inquiries for a long time before his death.

Tattered Timothy? I've been trampin' four years, ma'am, an' it's all caused I heard that the doctors recommended walkin' as the best exercise for me. Pim! Well, the doctors are right. Walk on.

Greater London contains more people of British stock than Canada, New Zealand, South Africa, India, and the British West Indies all combined.

W. N. U. 1024

## Beneficial Effect Of Grading

### Exporters More Careful of Quality When Filing Orders

There is abundant evidence that the system of grading adopted in Canada is having a beneficial effect. To this fact Dr. J. A. Rudolph, Dominion dairy and cold storage commissioner, bears testimony. He further says that improvement in marketing conditions has also aided in raising the status of butter and cheese. As regards butter, he declares that no other country has been able to produce more noticeable than in Ontario. Under the old conditions before grading was established, continues Dr. Rudolph, exporters were not always too careful of the quality of the different lots with which they filled orders for "dressed" cheese or butter. With the grades marked on the packages the quality turns out more uniformly as represented. In recent years grading has greatly extended and is now applied in the marketing of many farm products, including grain, fruit, wool, meats, and eggs as well as butter and cheese.

## Forests Provide Fibre Silk

### Prestit Fabrics Are Manufactured From Common Wood Pulp

Canadians need never worry about having cloth to wear as long as the country's forests hold out, was the assurance given the Royal Canadian Institute at Toronto by Prof. Harold Hiltner, McGill University. A number of years ago some scientists discovered cotton was made of dehydrated sugar molecules arranged in a certain way and also that common wood pulp was cellulose, another form of sugar molecules, and ever since that time the forest has been displaying the prettiest fabrics, and the most diverse forms of woven goods that were nothing more substantial than the wood they were made out of.

Artificial or silk fibres, known as merely a poor substitute of cotton, was simply ultra-refined cellulose into the form of thread, and as proof of this statement the speaker manifested some of it before his audience. As research went on, the speaker said, the product would be constantly improved.

## To Grow More Corn

### Alberta Farmers Bringing In Large Quantities

There will be a big increase in the acreage planted to fodder corn, and sweet clover this year in Alberta, according to the provincial department of agriculture. Farmers are already bringing in large quantities of these crops. There will be about ten thousand acres in sweet clover, and the corn acreage, which last season was estimated at 75,000 acres, will probably pass the 100,000-acre mark this year, for the province as a whole, with the bulk of it grown in Southern Alberta.

## Sending Holy Carpet To Mecca

The Egyptian Government has decided to permit the holy carpet to be sent to Mecca for the pilgrimage of the year 1354 of the Hebra or flight of Mohammed from Mecca to Medina. The carpet will take place during the summer. The carpet has been prepared and will be transported to Mecca in ten large boxes.

## Alberta's Mineral Production

### Value of Production Increased Nearly Three Million in Year

The total value of the mineral production of the province of Alberta in 1925 was \$25,065,718, compared with \$22,144,959 in 1924, according to a preliminary report of the Dominion bureau of statistics. Among the principal items of production during the year were: Coal, 5,587,215 tons valued at \$19,510,985; oil, 109,422 barrels valued at \$78,837; gas, 8,998,921 m. cu. ft. valued at \$5,760,000; cement, 29,357 barrels, value \$32,229.

The most outstanding feature of the production for the past year was the vast increase in the output of crude petroleum. In 1924, Alberta occupied but an insignificant place in the production of oil in Canada, but in 1925 it suddenly took first place among all the provinces of the Dominion, producing more oil than all the others put together. The comparison of production shows that in 1924 only 844 barrels were produced with a value of \$4,135, but in 1925, 162,435 barrels were produced with a value of \$7,528,327. The rest of Canada produced 14,821 barrels with a value of \$129,213.

## An Envious Position

### Canada's Per Capita Wealth On Par With That of U. S.

"In estimated national wealth in millions of dollars, Canada stands seventh on the list, higher than Australia, Brazil, Argentina and, in fact, higher than any of the newer countries which occupy positions twenty-fourth to thirty-fourth, respectively," Dr. D. A. Macpherson, professor of political economy, University of Alberta, stated in a recent address at Regina. In wealth per capita in dollars Canada is only surpassed by the United States and Great Britain. "Canada is among the only five nations showing a surplus on current account, and is also among these countries having a gold surplus. She ranks fifth among the nations as an exporter and seventh as an importer."

## Canada's Best Customer

### Big Increase Last Year in Trade With Great Britain

United Kingdom purchases from Canada during the twelve months ended in February totalled \$507,000,000. This was \$109,900,000 more than the amount purchased in the same period twelve months from Canada, and \$29,000,000 more than purchased in January, 1925.

On the other hand, Canada bought from the United States in the 12 months closed to the value of \$597,000,000, an increase from the United Kingdom valued at \$162,000,000.

## No Law On This

The Port Colborne branch of the Great War Veterans' Association has received advice from Ottawa to the effect that there is no law, rule, or regulation in force in Canada calling for the flying of the British flag on Canadian coasts on foreign battles in Canadian waters.

## Early Egyptians Used Parasols

Parasols were used by the ancient Egyptians and they are often represented on Egyptian monuments. In the year 1929 a new style of parasol came into use in England, said to have been designed by the Duchess of Rutland.

# Britain Gives Best Demonstration Of National Honor That The World Has Ever Seen

## Tourists Interested In Canada

### Requests For Maps and Information Received From U. S. in Every Mail

The natural resources intelligence service of the department of the interior at Ottawa, says: Every mail brings inquiries from the United States for information about automobile roads, canoe routes, camp sites and other details regarding summer holiday possibilities in Canada. Letters from such widely scattered points as Ann Arbor, Michigan; Arkhowsky, New Jersey; Madison, Wisconsin; Lowell, New York; Texarkana, Texas; Indianapolis, Indiana; and Gratzburg, Pennsylvania, have arrived in an interval of a few hours.

Most of the inquiries are relatively simple requests for maps and information about automobile road conditions and accommodations that may be expected. A great many want to visit the best dining districts. A surprisingly large proportion state that they wish to get entirely away from the travelled and popular routes. A passable road, a quiet bit of woods, a lake and a few miles of solitude are what they want most of the family parties who want most. Several intend to travel into country that offers a choice of permanent summer residences. When they strike the spot that suits them they intend to purchase it for recreation in future years. A few are interested in the mining camps and still others want to leave all road trails for the silent stretches of the Canadian "prairie." Some are even so venturesome as to be planning canoe trips into the Hudson and James Bay country. The routes to Port Albany and Port Nelson are especially popular.

Indeed the demand for information as to canoe routes has become so insistent and widespread that the service has been obliged to get out reports on upwards of a hundred trips of this character. The general summary of which has had to be prepared for the benefit of those who had rather vague ideas as to what part of the country they wished to include in their travels. The character of the questions asked shows that the travelling public is becoming more and more sophisticated and well informed in advance of the actual travel movement. The volume of correspondence that the service has developed this year indicates clearly the tourist movement for the coming season in Canada will exceed all previous records in every way.

## Mail Carried By Dog Team

### Only Means of Transport to Far Northern Regions

No bridge of humanly developed activity embraces so wide a range of means of transport as that of the post office. Every sort of carrier from the ocean liner, the limited train, the airplane, automobile, stage, horse, foot runner, is used, and last, but not least, the mail dog. This traverses the lonely boundless shores in winter, north of the Gulf of St. Lawrence from the straits separated by within 225 miles of Quebec City.

How many of those who have received a letter from the far north realize that the mail dog and his team are the only means of transport? Have they thought of how, in the clear of a winter's morning, with sparkling snow like miniature diamonds all about, the dog teams, fresh after a night's rest, bound bounding forward? Have they thought of the howling clouds, fierce winds and biting frost which render it almost impossible for man and beast to face its cutting eddies? At other times a snow storm, rivers that had been frozen are unbridled so that mushers and dogs are compelled to make detours to lead waters that had to get across. Then they either slog through the muck of melting snow, never stopping in their long distances. The mail men proceed!

## Wonderful Organisms In Water

### Seen Through Microscope One Moved By Means Of Spinning "Pinwheel"

Although a drop of water no larger than a pinhead may appear crystal clear to the unaided eye, it is really a marvellous study of a drop from the microscope. One of the New York zoological gardens showed that it was (seemingly) as many as 100 forms of life were spread out on a glass slide and examined with a high-power microscope. One of the organisms observed was a curious animal with an oddly formed triangular body with two spinning "pinwheels" as means of locomotion. It appeared to have the sense of sight for it avoided colliding with other objects and would reach out with its body to grasp convenient surfaces to help its progress. Popular Mechanics.

## An Albino Holstein

Something new in the way of livestock rarities is reported in the Breeds of Cattle.

"I am writing for the Milwaukee Cattle-Feeding Association in Pleasanton, Wisconsin," writes Clarence Englemann. "At Henry Rohrer's farm I found an albino bull calf. It is about a year old, with pink eyes, and is a grade Holstein-Friesian, born Jan. 2, 1926. It is healthy and normal, except in color. The skin is a three-fourths grade Holstein-Friesian, and the skin is seven-eighths grade Holstein-Friesian. Who knows of another calf like this one? I think it unusual, as I have never seen one before."

## Help Wanted

"Is this the fire department?" yelled the excited gentleman over the phone.

"Yes. What is it?"

"How far is it to the nearest fire alarm box? My house is on fire and I must turn in a call at once."

## Ice Skates Made In 500 B.C.

The oldest ice skates in the world, made of reindeer antlers, have been discovered in a museum. The date back to the fifth century B.C.

## Britain's Weekly Edition of the Wall Street Journal Says:

"During the current year, according to the report of the chancellor of the exchequer, Great Britain will pay us on account of our war debt, principal and interest, something over \$100,000,000 and will receive from her debtors not less than \$70,000,000, including German reparations under the Dawes plan. Britain's principal war debtor is France, which has been active, not to say ardent, in the collection of her own debt, but has not shown the same enthusiasm about paying anybody. Hence, among other things, the demoralized franc. As our loyal friend and an honest debtor, Britain should command our sympathy, and it seems a pity that our debtors should be left to appreciate the sterling loan which she has displayed where it would have been by no means difficult to procure and at a low price."

"According to the same authority, Britain's national debt at the end of last year, was \$7,735,000,000. This works out at \$121 per capita of the population, and it will cost every man, woman and child something like \$20 this year to meet the same national debt for interest and management."

"These are stupendous figures which we are considering. A population less than 40 per cent, of our own, working in an area which could very nearly be ticked away in Florida and would be left in Texas, and yet the population of the sterling loan which she has displayed where it would have been by no means difficult to procure and at a low price."

"It is curious how maximum left sentiment was for an early settlement. It is all very well to prate about national honor, but when a whole people, well known to be honest debtors will be dilatory and evasive, nevertheless reaches down to meet its own obligations to re-establish its currency at par and to take the whole world in the face with well maintained credit. The American, regardless of refugee Irish associations or German extraction, must take off his hat to the most practical demonstration of national honor the world has ever seen."

## Mail Carried By Dog Team

### Only Means of Transport to Far Northern Regions

No bridge of humanly developed activity embraces so wide a range of means of transport as that of the post office. Every sort of carrier from the ocean liner, the limited train, the airplane, automobile, stage, horse, foot runner, is used, and last, but not least, the mail dog. This traverses the lonely boundless shores in winter, north of the Gulf of St. Lawrence from the straits separated by within 225 miles of Quebec City.

How many of those who have received a letter from the far north realize that the mail dog and his team are the only means of transport? Have they thought of how, in the clear of a winter's morning, with sparkling snow like miniature diamonds all about, the dog teams, fresh after a night's rest, bound bounding forward? Have they thought of the howling clouds, fierce winds and biting frost which render it almost impossible for man and beast to face its cutting eddies? At other times a snow storm, rivers that had been frozen are unbridled so that mushers and dogs are compelled to make detours to lead waters that had to get across. Then they either slog through the muck of melting snow, never stopping in their long distances. The mail men proceed!

## Empire's Largest Silver Nugget

A huge silver nugget has just been returned to Ontario after being exhibited at Wembley for the past year. The nugget, which was found in the north of Ontario, is the largest and most valuable single piece of silver ever produced in the British Empire. It weighs 4,002 pounds and is valued at \$15,616.

## Busy Women and Girls

There are said to be nearly 200,000 women and girls employed in telephone work in the United States and Canada. One woman who has been a girl before the introduction of the telephone, the knitting factory and the typewriter—Woodstock Sentinel-Review.

## Most People Assume

Most people assume that the word "pandemonium" is simply a name.

## Society Girl to Make Movies

Miss Mary E. Cooke, a charming addition to the crowd of passengers making the trip to The West Indies this winter on the Canadian Pacific liner Montserrat, brought along a movie camera with which to photograph interesting sights on the cruise. At first time, taking movies of her friends, as the S.S. Montserrat pulled out of New York on March 1 for a 22-day cruise of Caribbean waters.

## French Train Honors Dead

**Slows Down When Passing Cemetery**  
Where British Heroes Sleep  
The blue train, running daily to the south of France, which is regarded as perhaps the finest train in the world, is to pay daily an act of homage to the British dead who sleep in France. It slowed down on Armistice Day as it passed the cemetery at Epinal, where ten thousand British heroes sleep. This act of reverence was repeated on the following days, and railroad officials have now decided that the blue train will slow down every day as it passes the cemetery.

The Nationalist Government, Ankara, has decided to introduce the English or Latin alphabet in place of the present cumbersome Arabic characters.

For years Melcher Graves' Worm Exterminator has ranked as a reliable worm preparation and it always maintains its reputation.

Christian of Denmark is the monarch of monarchs, the biggest king in the world. He is about 6 feet 4 inches tall and, according to his records, is every inch a king.

Does outboarder girls in the Maine, Ore., public school, and the last graduation class was composed entirely of boys.

Healthy Mothers!  
Healthy Children!

Mrs. Phoebe Claus

Hamilton, Ont.—"I wish I were able to convey to every weak and ailing woman the value of Dr. Pierce's Wonderful Medicine and what they have done for me. I am the mother of six children and Dr. Pierce's Favorite Prescription was the only medicine I ever took during pregnancy. I always got along fine, it kept me so well and strong that I was able to do my work right up to the last and I did not suffer with any of the troubles that come to most women at that time. Also I had very little suffering. My children were all healthy and strong and I regained my strength very quickly afterwards. 'Favorite Prescription' is the greatest medicine a woman can take. Mrs. Phoebe Claus, 24 Clyde St., All drug stores. Tablets or liquid. Send 10c to Dr. Pierce's Laboratories in Bridgeport, Conn. If you desire a trial pill, Favorite Prescription tablets."

## ON THE AIR

What is Doing in the World of  
Radio

A class of twenty California teachers has been trained to give lessons which they transmitted recently. They were listening to hear what they could hear, and they got 4AR McLean, Alameda.

Classes of the copyright bill now before parliament which affect radio broadcasting are to be amended or withdrawn to conform with requests of the Canadian Association of Broadcasters.

Radio soon will supplement the present inter-departmental telephone system of the New York police department to speed up the broadcasting of alarms and the apprehension of criminals.

Charles Sissons and "Mac" Mackintosh, two Regina radiofans, are repeating over a piece of good fortune which they encountered recently. They were listening to hear what they could hear, and they got 4AR McLean, Alameda.

A broadcasting station as powerful as London is being constructed by a London amateur to enable Arthur Cook, a British military in London, to preach to his "parishioners" in the remotest parts of the island, where the rigors of the weather make travelling difficult.

Radio fans, who often wonder how call letters are selected are told that their use is regulated by an international agreement. Germany is allotted all three-letter combinations from AAA to ANM; France, F; Japan, J; Great Britain, B; Canada, C; and so on. Three- and four-letter combinations from KDA to KZZZ and all that begin with W and N belong to the United States. The U. S. Government reserves for its own use combinations that begin with N and assigns WJLA, WJZZ and WJZZ to the army.

**A Poe to Achna.** Give Asthma half a chance and it gains ground rapidly. But give it repeated treatments of Dr. J. D. Kellogg's Asthma Remedy and it will fall back on its haunches. There is no halfway measure about this remedy. It goes right to work and drives asthma out. It reaches the most troubling passages and leaves no place for the trouble to lurk. Have it by you for ready use.

## Turkish Women Cling To Scarf

**Stoutly Resist Official Efforts To Introduce European Hat**  
Men are being hanged in Turkey for refusing to shed the fez in favor of the western hat, but the women are stoutly resisting official efforts to reform their headwear, and, in the language of the street, "are getting away with it."

Meetings of women have voted to give up the light scarf covering the upper forehead, which so gracefully coifs the modern Turkish society woman, on the ground that it is both more becoming and less expensive than the hat.

## Fabric Combinations Achieve Smartness in Two-Piece Frocks

Fashion's fancy for combining two materials in one costume is charmingly expressed in this model which has fluting shirt, round collar and bands on the sleeves of navy-blue tulle. The inner Empire of Canada decked at Victoria, April 6, from the Orient with 600 passengers. Included in the large sum 5,640 bales of silk valued at \$6,000,000.

Professor William P. Alexander, of the Buffalo Society of Natural Sciences, has a fine live-foot-long crocodile on display. It arrived from Guatemala in a bunch of bananas.

Ulster, Ireland, has a new organization, "The Ulster Tourist Development Association," to advertise that part of the country as an attraction for tourists.

The dispatch of a delegation of Canadian farmers to Great Britain and Ireland has been recommended to the Canadian Government by Hon. P. C. Larkin.

Traffic regulation of the pedestrian as well as the motorist was adopted as an underlying principle of the national traffic code at the national conference at Washington on street and highway safety.

Opening up of road communication to within thirty miles of the Red Lake remaining district was assured as the result of an agreement between Hon. W. R. Church, minister of public works, and V. A. Anderson, representing a large mining syndicate.

Explorations and Comments  
The temptation of Sin, verses 1-3.—Read The Historical Background.  
The story begins with the words, "Now the serpent was more subtle than any beast of the field which Jehovah God had made." The serpent is here the genius of evil personified. It is Milton, not Gensels, that calls the serpent Satan. It is easy to see that the serpent is made the symbol of temptation because of its glittering eyes, twisting coils, stealthy manner and deadly fascination.

The serpent shows his subtlety in his first remark to the woman—when he holds more susceptible than the man. "Yes, hath God said, Ye shall not eat of any tree of the garden?" he questions. The interrogative sentence is also exclamatory and is designed to arouse distrust in God. He skimpers gives the thought freely by exaggerating it. "Ay, and so God hath said that ye shall not eat the fruit of any tree in the garden?" and finds the change of the prohibition purposely exaggerated in order to provoke inquiry and criticism.

"The serpent is entirely incidental, says a recent issue of the Bible, and tempt a man unless there is a serpent of lawless desire within."

Some people believe in luck just because they never have any.

Izzy: What is the difference between amnesia and pneumonia?  
Dizzy: Search me.  
Izzy: Why, amnesia comes in bottles and pneumonia comes in chests.

## Still Enjoying Life at 84

**Thanks To  
That  
Wonderful  
Remedy**

Mrs. P. H. Miller, 1845-18th Ave., East, Vancouver, B.C., writes: "Five years ago my husband suffered terribly with severe attacks of palpitation of the heart and smothering spells, and two doctors stated that he could not possibly live six months. A friend recommended Miller's H. and N. Pills, with the result that my husband is still enjoying life at the age of 84 years."

He has improved so wonderfully that he can now climb the stairs without having those awful pains in his back.

Put up immediately The T. Miller Co., Limited, Toronto, Ont.

**R. TYLER**

THREE GENERATIONS REPRESENTED BY  
PARTY OF U.S. SETTLERS FOR SASK.

THREE generation of hardy Americans were represented by the first party of settlers to cross the line this season under the supervision of Prof. O. B. Grimes, land and colonization agent of the Canadian National Railways at St. Paul, Minn., who appears in the photograph in the centre of the back row. Twenty-four individuals, of whom 21 were bound for Lethbridge, Sask., where they bought land from the C.N.R. last year, and three for Kuroki, Sask., made up this advance guard of homeseekers from the United States. They brought with them five cars of effects, which include farm machinery and live stock. This entire party came from Thompson, N.D., Mr. and Mrs. E. F. Kennedy with their children and

grandchildren, numbering 21 persons; Mrs. John Anglesburg, a sister of Mrs. Kennedy, accompanied her husband and daughter; Mr. and Mrs. J. C. Webber and small son, making up the balance of the party. The Kennedy connection is taking up four farms at Lethbridge. The movement of settlers from the United States has just begun, according to C.N.R. colonization officials at Winnipeg and W. D. Robb, vice-president in charge of that department, who has just visited the settlement branch office in the Central States. The latter stated that the flood of inquiries being received by the company this year are from a splendid type of farmer and a larger movement is expected this season than for many years past.—C.N.R. Photo.
